QUESTIONS?

Please contact the school (number and/or email above) if you have questions regarding any of the programs.

Autumn Romig, alumni and parent of a Primary Student

The Parent Study Programs help you better understand what and how your child is learning. Even though I attended Radmoor for primary, the programs are extremely insightful to understand the 'why' behind what I learned 40 years ago and how it will benefit our son.

I thought the last thing I wanted to do on a Saturday morning was attend a workshop on how my son would be learning math. I came away from the workshop thinking my husband needs to attend this! I told him, "You would have loved math if you had learned it the way it is taught at Radmoor".

After leaving "Getting Ready for Montessori", my husband and I looked at each other and said, "we need to let our son do more around the house". Somewhat to our amazement, our son could do much more than we thought he was capable of doing. Now when we hear him say, "I do it", we let him.

I am amazed at what the children learn at such a young age, yet with the methods, it seems logical and well within their grasp. With the Parent Study Programs, you see how logical the environment is and how their work builds skills which will help them with more advanced tasks. The programs re-confirmed that sending my son to Radmoor is the right decision.

Shelly Stahl, parent of a Primary Student

I absolutely recommend making time to participate in the Parent Study Programs. It was so eye opening to see what my son was learning and the process by which he was learning it. Our conversations about his day changed completely, as if I now understood his "language". As a bonus, I am better able to direct tasks at home in a way that makes sense to my son and reinforces what he is learning at school.
